#1 Selling Tube Bender  
in the USA to Racecar Fabricators

### MODEL 3 BENDER

**DIES NOT INCLUDED WITH BENDER - DIES FROM \$300ea**

Designed for the professional fabricator who requires a dependable, accurate and affordable tube & pipe bender. With rugged all-steel construction and 100% CNC machined parts it has been designed with durability in mind. Round tube from 1/2" to 2" and Square Tube from 1/2" to 1.5" can be bent. The Model 3 uses a high ratio ratchet mechanism to allow the operator to bend the larger sizes of tubing without assistance. Includes Degree Ring Kit (for accurate bending).

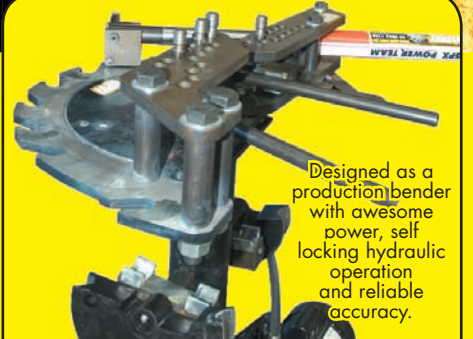

**HYDRAULIC SYSTEMS AVAILABLE AS AN OPTIONAL EXTRA FOR MODEL 3 & 32 BENDERS**

### MODEL 32 BENDER

**DIES NOT INCLUDED WITH BENDER - DIES FROM \$300ea**

The Model 32 is essentially a super heavy duty version of the best selling USA Bender, the JD2 Model 3. With fabricators now needing the capacity to bend 2" o.d. x .250" wall dom tubing along with thin wall tubing we took the basic principle of the Model 3 and simply made it better. The Model 32 is the result.

Designed as a production bender with awesome power, self locking hydraulic operation and reliable accuracy.

**MODEL 4 BENDER**  
With Air Over Hydro Pump & Ram

**240V ELEC MODEL 4 BENDER**  
Now Available

**FREE**  
TUFF TRUCK  
HOODIE

With OPW Winter Warmer Pack

### TN100 NOTCHER

Notches 3/4" through to 2" O.D. tubing at angles up to 50° in under 15 seconds. It features a ground and polished stainless steel shaft, rigid bearing block incorporating twin needle bearings & separate grease seals for maximum rigidity and reliability. The heavy duty frame is made from 1/2" thick 6061-T6 and its entire face has been milled flat. The TN-100 may be mounted to a drill press or clamped in a vise and used with a 1/2" hand drill.

### NOTCHMASTER

**"BEST BANG FOR BUCK"**

Capacity of 3/4" to 3" OD. Angles up to 50°  
CNC machined  
Heavy duty 1.25" thick steel frame.  
2-axis adjustable tubing clamp.  
Can offset notch up to 1.5" vertically.  
Uses inexpensive bi-metal hole saws.  
Requires an ordinary 1/2" hand drill

PIPEMASTER - makes working

**OPW OPW OPW**

**OPW RACEJACKERS**

**SUSPENSION THAT WORKS**

OPW Racejackers are designed not only for Tuff Truck Vehicles & Rock Crawlers but also for the weekend warrior. The Coil Arrangement is trapped at both ends allowing the coil to not only compress but also extend giving extension tension. Acting exactly like a sway bar, giving you the ultimate in travel & stability. The shock is also very compact in its design. The use of Air combined with the coil gives you a complete range of adjustment in spring rate, so if your initial estimations are out then no need to just throw it all away & buy new coils.

For the **ULTIMATE TRAVEL**  
 Choose the **Air Coil Over Hydraulic Racejackers**  
 Providing an additional 14 & 16" of Hydraulic Lift.

**TESTED AND A PROVEN WINNER**

Also Available as **Air Coil Over shocks**  
 12, 14, 16" Travel.

**OPW STEEL WHEELS**
